# yabble

Get detailed insights in minutes with Summarize.

AI powered data summarization is as easy as 1, 2, 3, Yabble.

Forget painstakingly reading through transcripts, sifting through notes, and inefficiently collaborating with teams. Yabble Summarize is here to provide accurate and in-depth summaries of your data, saving up to 80% of analysis time. Transform in-depth interviews into key challenges, opportunities, actions, and conclusions with just a few clicks.

Take advantage of the benefits of Summarize

Accurate, in-depth summaries

The precision of your summaries is critical to making insightful business decisions. We designed Summarize to ensure your results are both accurate and cover the breadth of information contained in your data.

Reduce speed to insight – improve productivity

Our fully automated AI technology makes manual reading and note taking a thing of the past. Summarize automates the data-crunching for you so you can focus on higher value strategic thinking.

Seamless collaboration

Use your Summarize output to quickly and efficiently share key information from your data with stakeholders. Summarize generates an executive summary which can be quickly copied into your collaborative channels for discussion and review.

How does Summarize work?

It's as easy as 1, 2, 3, Yabble.

/1 Upload your long-form, video and audio data

/2 Let Summarize work its magic

/3 Jump straight to insight

"I used the Summarize product to analyze about 10 executive interviews. When I checked the quality versus what I would have written - the were no exclusions or inclusions that shouldn't have been. The final product I delivered to the client took about 3 hours instead of 30."

Gregg Archibald // Managing Partner, Gen2 Advisors
